

Organization: Ministry of Public Education Of the Republic of Uzbekistan

Project Title: Strategy of Introducing Sustainable Development Goals to Public Universities

Project objectives: Uzbek Higher Education develops at a high pace - last five years have seen local universities entering the world rankings, number of research articles in bibliometric databases has tripled, students and faculty members participate in international collaborations more than ever before. However, academic world is still rather conservative when it comes to integrating international standards and policies. Ministry of Education plans to introduce Sustainable Development Goals across all public universities, offering institutions clear guidelines on how to handle the process of embedding SDGs from A to Z. SDGs need to become a part of the universities' DNA, from curricular to infrastructure management.

Expected Outcomes:

1. **Market Research** - overview of existing practices, review of what is already being applied around the world (grouped by the market development state, socio-economic status of the countries, etc).
2. **Analyses and Recommendations** - the project team will analyse which parts of best practices are relevant to Uzbekistan, which parts of the frameworks might work in the country today and on the five years horizon, what kind of resources and policies might be needed.
3. **Report and Design** - a roadmap with clear indication of the key steps and resources needed, key stakeholders and contributors, including national and international ones.

Deliverables:

- Market analysis report;
- Map of main stakeholders;
- Strategic roadmap, including dependencies and calendar plan
- Guidebook on SDGs introduction to universities curricular and campus management.
- Optional: recommendations on community engagement.

Is this project reoccurring?

Yes

Would you like for this project to be delivered by more than one team?

Yes

Which sector is this project focused on?

Powered by

In collaboration with:

FUTURE17

Sustainable Development Goals
Challenge Program

Education

Government & Policy

Which skills might be required for the successful delivery of your project?

TBC

Can the project outcomes be shared with the public?

Yes / No - TBC after the outcomes are presented

SDGs related to this project:

SDG 4, SDG 9, SDG 17

Resources available to the team:
